

Dual Deluxe Toilet Suite Set Up Requirements

There are some important factors that you need to consider before hiring one of our Dual Deluxe Toilet Suites. Please read the following requirements carefully.

Suitable access is required. The Dual Deluxe requires at least 2400mm width access and 2900mm height access. Make sure it will fit where you want it to go. Remember to include the tow vehicle and don't forget roof eaves, pipes, air conditioning systems, trees and shrubs and other obstructions.

The Dual Deluxe weighs 600 kilograms with the trailer. Approximately 350 kilograms without the trailer. Email photos of site and access if you are unsure. Please have all plants trimmed and obstacles removed before delivery.

The Dual Deluxe unit is loaded onto the trailer with the doors at the rear. Please advise us if you would like it loaded differently. The Dual Deluxe is raised above the trailer, the trailer is removed and the Dual Deluxe lowered back to ground level on site.

Electricity requires a 10 AMP power supply of 240 volts. Please ensure the power point is in good condition. We supply a 30 metre lead tagged and tested for your safety. No power boards or double adaptors can be used. A generator of 3 KVA is sufficient for remote locations.

Water needs to be connected so a tap is required. We will supply the tap connection and 30 metres of AS2070 drinking quality hose. Extra hose can be supplied at your request.

Sullage is discharged through a 32mm flexible hose pumped automatically into your existing sewer via your overflow relief gully, inspection opening, or similar access point (see picture) as the Dual Deluxe unit is used. Inspect your outside sewer system for a suitable opening. If in doubt please contact your local plumber or arrange a pre-hire inspection. Septic tanks and envirocycle/biocyte type systems are fine. We supply all necessary hoses and connections. Please advise us if the distance to sewer services is greater than 30 metres. Maximum distance is 50 metres with a one metre rise. We have 1000 litre tanks for hire for sites without sewer or septic facilities (fees apply).

If you supply labour to manoeuvre the Dual Deluxe unit into place by hand then the same labour must be provided on pickup or extra charges will apply.

The Dual Deluxe must be cleaned out before pick up. Excessive dirt and grime will attract a cleaning fee dependant on time required to return the Dual Deluxe unit to the same condition it was in when handed over to you.

If we cannot install on delivery due to unsuitable access or services you may forfeit your whole hire payment. A pre-hire inspection can be arranged. Our representatives are good drivers but are not precision stunt drivers. We will not risk damaging the Dual Deluxe unit.
